Ric

I am responding to your letter of September 29, 2008 regarding the most recent fire flow tests at Meridian Lake Park. (For the benefit of those who are not recipients of your letter I am attaching the cover letter and the results of the most recent tests, not the previous test results which were also attached.)

We appreciate the work you and your staff have done to validate the fire flows. However, we take issue with your comments in the last two paragraphs. As we stated in our letter of July 17, 2008 addressed to the Mt CB Water and Sanitation District with a copy to you (copy attached), the Board of Meridian Lake Park has rescinded the instructions given in Ron Baker's letters of 2/21/07 and 3/1/07. Therefore, the next step now that you have undertaken the new fire flow tests is for the MLPC Water Committee to meet with you to discuss a way forward.

I will be away until October 16, but look forward to meeting with you at a convenient date after then.

Sincerely,

Bill Ronai
President
Meridian Lake Park Corporation
